THE PROBLEM

Every month, real estate agents export their lead lists from Zillow, Realtor.com, and Facebook Ads — and every month, those exports are unusable without hours of manual cleanup. Phone numbers arrive in five different formats. The same contact appears multiple times. Names are in ALL CAPS. Budgets say "\$450k" in one row and "650000" in the next. And leads with a valid phone number but no email sit quietly in the file, doing nothing — potential commissions that never get followed up.

SAME-NAME CONFLICT SCORING

Detects same-name groups and scores each pair using business logic — area codes, budgets, sources, and FL metro geography — not fuzzy string matching.

Verdict	Scoring signals
● LIKELY DUPLICATE	Same area code (+3) + one missing email (+2). Score ≥ 4.
● POSSIBLE DUPLICATE	Same source, similar budget, partial overlap. Score 1–3. Agent decides.
● PROBABLY DIFFERENT	Different FL metros (Tampa vs Jacksonville = -2). Score ≤ 0. Keep both.

THE TIME MATH

Standardize 50 phone numbers	~45 min	< 1 sec
Remove duplicate records	~30 min	< 1 sec
Fix name casing, split First + Last	~15 min	< 1 sec
Normalize budget values	~20 min	< 1 sec
Score same-name conflicts	~60 min	< 1 sec
Write personalized outreach scripts	~30 min	< 1 sec
Total	~3.5 hrs	< 10 sec

About This Service

This tool is part of a retainer-based AI operations service for real estate professionals and boutique businesses. Rather than selling generic "AI automation," each engagement targets one specific painful manual task — the exact workflow you're already doing by hand every month — and replaces it with a hardened, maintained system.
